ENGLISH USING THE REFERENCE GRID TO REPORT LOCATIONS

The grid divides Somalia in to 404 rectangles each corresponding to the internationally recognized topographic map files.

Each of these rectangles is given a unique alpha-numeric reference number. Each of these rectangles is then sub-divided in to 80 square cells, 10 across and 8 down. Each square cell is approximately 5 km by 5 km, representing an area of 25 square km. The square cells are referenced from A to K horizontally and from 1 to 8 vertically.

To report your position:

-Locate the square cell you are in on the map using estimated distance and direction from a known point such as a Clinics, schools or settlements as a guide.

-Note that the alpha-numeric rectangle code (e.g. NA-38-013)

-Note the Numeric reference of the square cell

-Note the Alphabetic reference of the square cell.

-When reporting your position, quote the full grid reference by combining the two references (e.g. NA-38-013).
